

MIGHTYLAM 2700™

We measure a competitive advantage by how it benefits your bottom line.

Banner American Products' MightyLam 2700™ gives you an immediate competitive advantage over your competition. **It delivers 27 inches of wide-laminating capacity.** That's two more inches than a conventional 25" machine, and that may be the difference between getting the job, and not.

The advantages of the MightyLam 2700™ are even more apparent when considering its ease of use, high-end workmanship, durability, and solid performance dependability.

It's the ultimate production solution (and profit center) for commercial print shops, copy shops, service centers, sign shops, in-house graphics departments, and more.

High on productivity, low on cost the MightyLam 2700™ offers advantage features, such as: capability to laminate from .0015" to .010" gauge film and mount materials up to 3/16" thick, simplified, easy-to-set heat controls, and a variable speed control for operating at any speed up to 10 feet per minute.

Take a closer look at the MightyLam 2700™ advantage-features and benefits.
