

System Three™ Pro

Packed
with features
for maximum
convenience
and
performance

Bind documents up to 3" thick with the high capacity System Three Pro.

System Three™ Pro

Pressure bar firmly holds sheets for a compressed, professional bind. Automatically raises when binding is complete.

Bind speed indicator adjusts bind speed to document thickness.

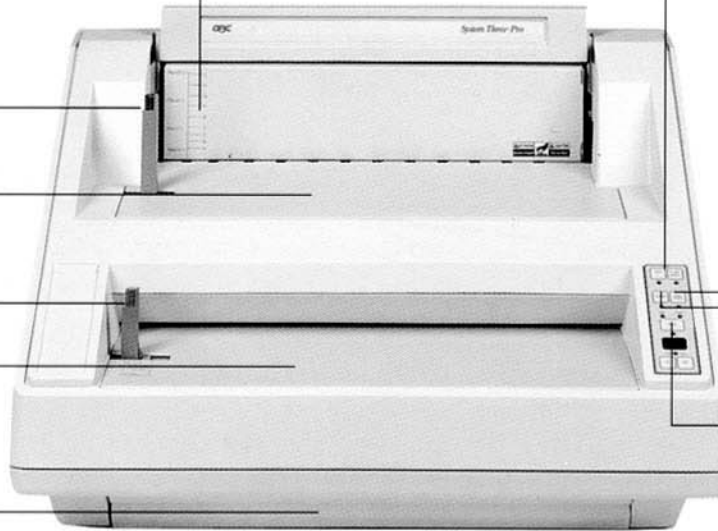

Bind edge guide adjusts to align paper for perfectly squared pages.

Flat binding surface prevents page shifting during binding.

Punch edge guide adjusts to properly align paper for easy, even punching.

Flat punching surface makes paper alignment easy.

Debris tray slides out for easy disposal of paper chips and binding pin fragments.

Auto punch selector selector lets you choose different punching options: button or automatic.

Debind feature lets you conveniently revise and update documents after they're bound.

Electric power punch can punch up to 25 pages at a time (standard 20 lb. bond).

System Three Pro delivers maximum productivity in a desktop system.

Designed for moderate to high volume users, the System Three Pro is a sturdy, heavy duty punch and bind system. It makes short work of big binding tasks and offers all of the features needed in a desktop binding system. The System Three Pro punches and binds simultaneously, and allows quick binding of documents up to 750 pages (3" thick) with up to a 14" binding edge. Your document is firmly bound and every page stays perfectly aligned, for a neat, professional appearance.

Electric power punching saves time and work, whether you use the punch button or automatic punch feature.

The hot-knife technology ensures a custom, secure bind every time, by shearing off extra binding pin length and heat-sealing the strips. Separate heating and cooling elements give the

tightest, most compressed bind of any punch and bind system. The adjustable bind speed offers the flexibility of reducing your bind speed when binding small books of 1" or less, increasing your bind productivity by up to 50%. A debind feature makes adding or deleting pages almost effortless.

System Three Pro helps you look your best.

The System Three Pro is the fast, easy way to produce proposals, briefs, reports, presentations or other documents that command respect and attention. Heat sealed strips mean that your documents are secure. Matching covers complete the look, and are available in distinctive Regency, Linen and crystal clear Transparent. Or, choose hardcase covers for library-quality books for your most important presentations.

Specifications

Punch Capacity: 30 sheets (20 lb. bond)

Maximum Binding Capacity: 3"

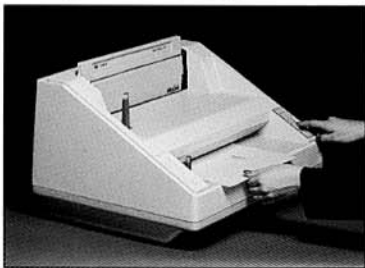

Binding Speed: 1" and under-8 seconds
Over 1"-18 seconds

Dimensions: 22.5"W x 18.0"D x 13.5"H
