Softwood Lumber D

Bind documents up to 2" thick with the powerful VeloBind System Two.

**VeloBind®
System Two™**

Pressure bar firmly holds sheets for a tight, professional bind.

Indicator light flashes when binding is in progress, goes out when binding is complete — about 10 seconds. Audible tone also signals you when binding is complete.

Bind edge guide adjusts to align paper for perfectly squared pages.

Push button electric punching produces more finished books per hour than a manual unit — and with operator ease and efficiency.

Full-size binding surface maintains page position during binding.

Punch edge guide adjusts to properly align paper for easy, even punching.

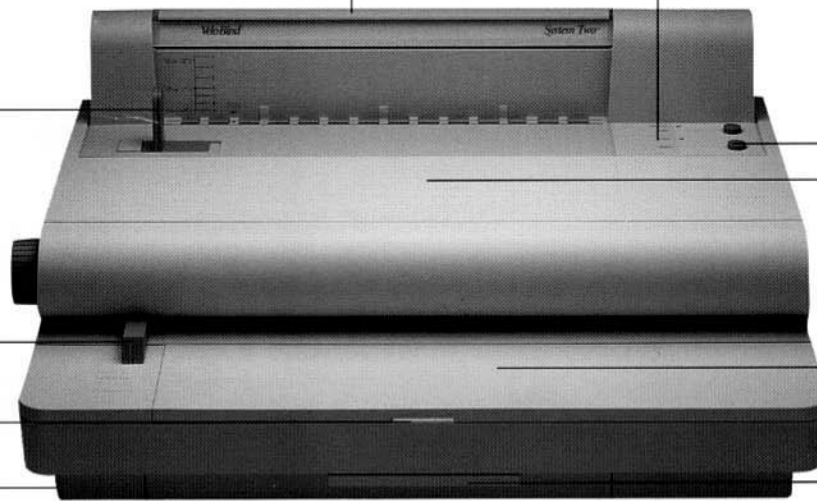

Exclusive auto-reverse Jam-Stopper® alerts user if punch is overloaded, and prevents a paper jam.

Storage tray holds binding strips so they're always handy. Also includes operating instructions.

Flat punching surface makes paper alignment easy.

Bind counter (optional) lets you keep track of your binding output.

Debris tray slides out for easy disposal of paper chips and binding pin fragments.

System Two combines versatility, convenience and ease of use.

VeloBind System Two is the ultimate desktop binding system for moderate volume users. It binds documents as short as a few pages or as lengthy as 500 pages, and can be used for document sizes up to a 14" binding edge. Each document looks custom-bound because the hot knife binding system automatically shears off extra binding pin length as it seals the strips for a permanent bind.

Electric power punching saves time and work, and punches perfectly every time. What's more, there's no need to worry about jams because the Jam-Stopper® reverses the punch if it's overloaded.

VeloBind for professional appearance and security.

VeloBind System Two lets you produce proposals, briefs, reports, presentations or other documents that have a look of distinction and command respect and attention. VeloBind strips keep your document secure and protect its integrity.

Covers complete the look, and are available in distinctive Regency composition, linen, Leatherette and crystal clear transparent. Or, choose hardcase covers for library-quality books for your most important presentations. Velo® binding is the easy way to present a professional appearance for all your documents.

Specifications

Punch Capacity: 22 pages (20 lb. bond)

Maximum Binding Capacity: 2"

Binding Speed: 10-12 seconds per cycle

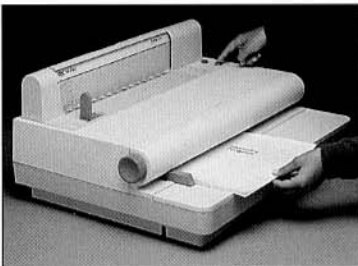

Dimensions: 23.5"W x 10.5"H x 17.75"D

Weight: 45 lbs.

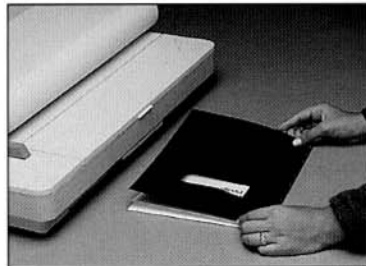

Power: Standard 120 volts, 60 Hz, 4 amps
or, available in some areas, 220-240
volts, 50 Hz, 4 amps.

Part number: 9707030

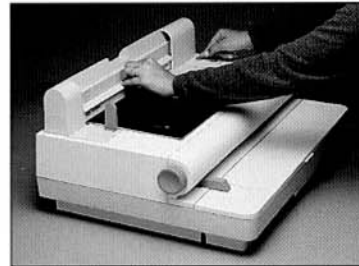

Binding is fast and easy.

First, align pages in the electric power punch and press the punch button.

Second, add pre-punched, covers.

Third, add binding strips and lower the pressure bar.
