The **Cassida Omni-ID combines a powerful automatic counterfeit detector** with advanced ultraviolet LED illumination into a single machine that authenticates both US currency and IDs. The Omni-ID gives you confidence and protection, assuring the dollars, identification cards and checks you take are genuine.

Simply feed a bill through and a green PASS or red FAIL will immediately illuminate, signifying whether the money is genuine or suspect.

Omni-ID uses industry-leading UV LED technology to authenticate security features that can only be viewed under a specific UV light spectrum. Place an ID or card in the lower slot and powerful, long-lasting LEDs automatically illuminate UV security marks.

Features

- Omni-ID removes doubt about authenticity – PASS and FAIL lights illuminate powerfully enough to be seen in even the brightest retail settings.
- Omni-ID works faster and more conclusively than counterfeit pens. Results show in less than half a second, immediately telling you whether a bill is legitimate or counterfeit.
- UV LEDs are long lasting, giving you years of protection and eliminating the need to replace UV bulbs common in other UV detectors!
- Omni-ID LEDs were scientifically selected to vibrantly illuminate security markings and show up under bright retail lights.
- Applicable Currency: United States Dollars
- Card/ID types: Driver's licenses, credit cards, checks, passports and others
- Verification types: UV-LED, MG, IR, color spectrum analysis
- Verification speed:
- Display type: LED
