This booklet maker has been discontinued and replaced by the [StitchFold Bookletmaker](#).

Other Bookletmakers can be seen on our [bookletmakers](#) index.

This is a unit used for Demonstration purposes in our office. It's been used to make 3500 Booklets.

Ideal for high quality, short-run color applications, Duplo's DBM-80H booklet-maker can be used in-line or off-line with Hewlett Packards' HP LaserJet 8000DN*, 8100DN*, Mopier 320, Color LaserJet 8500DN and 8550DN Series printers to create and integrated printing and bookletmaking system. In addition to offering the convenience of true hands off operation, the bookletmaker's unique vertical design makes it extremely compact.

When used in line with an HP LaserJet printer, the DBM-80H fully integrates with the printing system and the digital front end. This means paper size settings are automatic. Variable booklet sizes and flat sheets can run continuously without interruption, and fold only documents also can be accommodated.

In the off line mode, which can be accomplished at the simple touch of a button, the DBM-80H offers automatic setup and changeover. As an added convenience, a hand feed station allows users to easily merge color documents with black and white pages.

Booklets can be produced at speeds of up to 2,000 per hour, and precise face trims are provided by the optional DBM-80HT trimmer

*requires either a C4780S multiple input tray or C4781A high capacity input tray and a C2985B EIO disk drive.

ADSS offers a 90 day parts warranty on all refurbished equipment. This warranty covers any defective parts and excludes wearable parts.
