This simple and dependable 24" shrink wrapping system is great for low to medium volume packaging operations. Protecting your product with clear film only requires these three simple steps:

1. Just insert your product into the shrink film and depress the shrink wrap heat sealing arm, cutting and sealing the film in seconds.
2. Then turn the package 90 degrees and seal the remaining open side of the film.
3. Use the included heat wrap gun to shrink the film up tight around the package.

You'll have the identical appearance and utility of packages wrapped on an expensive production shrink system.
