The Standard AccuBind Pro Tape Binder has been Discontinued and replaced by the [AccuBind Pro2 Tape Binder](#)

See our [Tape Binding Machine](#) index for a complete list of our current Tape Binding Machine models.

The Standard AccuBind Pro Document Binding System uses heat-activated strips known as tape binding strips. These tape binding strips have a natural flexibility to provide a strong, durable and attractive bind. Superior quality thermal-bound documents are produced simply, quickly and economically. Finished documents are flexible, lie flat when opened, are colorful and have a bind that will last for years. No punching or drilling needed. The Standard AccuBind PROs attractive woven linen thermal binding strips do it all.

### Features
