The PBPro 201E has been discontinued. It has been replaced by the [PBPro 301 Electric Comb Punch and Bind Machine](#).

The PBPro 201E Electric Comb Binding Machine is heavy duty and will help you make comb bound books easily. It's all metal construction makes it reliable and its features allow you to bind as many comb bound books you need, quickly and precisely. It can easily punch 15 sheets of 20 lb. paper with the push of a button thanks to its built in electric comb punch. The PBPro 201E has punch pins that can be disengaged to allow binding of different size document. Without the ability to disengage a punch pin you would have your document with half a hole punched in the corner.

Another feature that allows you to get the perfect bound document is the adjustable depth margin guide, this lets you change the distance between the hole and the edge of the paper, this is useful for larger comb sizes allowing your comb bound book to open smoothly. On the top of the machine there is a comb opener, you insert the right size of comb supplies, use the lever to open it and place your punched documents in the comb and close it, leaving you with your finished comb bound book. The PBPro 201E Comb Binding Machine comes with a 2 year warranty and we can help with any questions you might have about this machine.

Below is a video demonstration on the PBPro 201E that will walk you through the comb binding process.
