The AutoBook booklet maker has been discontinued. We recommend the [BookletMac Booklet Maker](#) instead.

The AutoBook booklet maker features push button booklet making, it staples up to 15 sheets of 20 lb. paper automatically making booklets in a few simple steps. The Autobook bookletmaker works by sensing the paper when you place it in, it then grabs, staples and folds it into a booklet all automatically. This booklet maker will make 15 sheets booklets but we recommend going up to 12 sheets since a 15 sheet booklet does not fold perfectly crisp.
