The Cassida 5700 Professional Bill Counter incorporates a bill turner that gives this back loading bill counter the feel and convenience of top loading machines. With its wide range of features, the 5700 is a great all-around bill counter for organizations that process large amounts of currency.

ValuCount™ uses the denomination selected by the user to calculate the dollar value of the count. By activating ValuCount in the add mode, you can count different denominations while keeping track of the total value. The Cassida 5700 also offers add, count, batch, and add + batch modes, making it the perfect choice when all-around performance is a requirement.

Counting begins automatically when bills are placed on the hopper platform. No need to push bills into the hopper, the innovative bill turner on the 5700 will do that for you. A large LED screen showcases number of bills counted, as well as denominations and total value of count when using the available ValuCount feature.

Ultraviolet (UV and UV/MG models), and magnetic sensors (UV/MG model) are able to detect a wide range of counterfeit bills. Once a counterfeit is detected, the 5700 stops the count and dispenses the suspect bill into its stacker for removal. Pressing the start button continues the count and automatically deducts the counterfeit from the overall total.

Infrared (IR) sensors are able to spot a wide range of bill discrepancies, including half, double, and chain notes. In all cases, the 5700 will stop the count, alert the user with a beep, and display the error type on its screen.

Accuracy, reliability, and ease of use are not the only advantages of the 5700; its lightweight, compact design and integrated carrying handle make it easy to take it on the go, allowing you to count currency anywhere.

## Features

- UV ultraviolet markings detection
- Intelligent double note detection
- MG magnetic ink detection
- Note Size detection
- Half not detection
- IR infrared sensors
- Precision counting
- Computerized adding
- Accurate batching 1 - 999
- Simultaneous adding and batching mode

## Specifications

Warranty	<b>3 year full parts and labor extended warranty</b>
Power	110 VAC, 50-60 Hz, 80 W
Size	8.3" x 11.0" x 10.7"
Weight	13 Pounds
Shipping Weight	14 Pounds
